

# ROCKY MOUNTAIN SCHOOL OF PHOTOGRAPHY

## 2-DAY PHOTO*focus*

### LEARNING TO PHOTOGRAPH WITH YOUR DIGITAL SLR // **JANUARY 21-22** with **Doug Johnson**

It's a rather simple concept that gets overlooked more often than not: The more you know your camera, the better images you will create. If you want to move beyond "happy accidents," and start creating "educated, intentional" images, join Doug Johnson for an in-depth primer on using your digital SLR to create better photographs. This two-day course includes location shooting as well as classroom lectures and critiques.

### USING PHOTOSHOP ELEMENTS // **FEBRUARY 25-26** with **Kathy Eyster**

Adobe Photoshop® has been the workhorse of photographers, graphic designers and digital artists for years. The program offers almost limitless control over any situation imaginable. But what if you don't want or need unlimited possibilities? Enter Photoshop Elements, a streamlined version of the software that fits the bill for many photographers. This course with Kathy Eyster gives you thorough, hands-on experience with Photoshop Elements so you can begin to work with your images how you want to.

### USING YOUR FLASH // **MARCH 24-25** with **Doug Johnson**

When we say "flash," we aren't talking about that little thing that pops up whenever your camera thinks it should. We're talking about that extra appendage that sits atop your DSLR, confuses most users, and is to blame for "blasting out" more than a few great moments. Doug Johnson addresses your flash fears and helps instill confidence when it comes to using on and off-camera flash.

**\$279 PER COURSE**
